Yes, we're
filming
already.

Welcome everyone to the Bureau of Surrealist Investigation in Mozambique, or, Departamento de Investigação Surrealista em Moçambique; DISMO. I am your host, Syria of Antares, joined by Fernandes Meigos. Mister Meigos just recently published the book 'Let's talk about sex baby, or should I call you bitch'?

Mister Meigos has won countless awards and grants, has had an illustrious career so far, he wrote many books that have been translated into many languages. Members of the DISMO audience have been demanding for this guest to come on this show, so, uhumh, finally, here is your darling.

Prazer, oh, I mean, pleasure.

Anyone who confronts people with an unpleasant perspective on things is going to be attacked.

Very emotional responses..
Yes, and I am sorry, but yes. Even in your book this is an issue you often touch upon.

What does the message of your book mean for our future doctor? But please, focus on our medium to long term, that what is coming to us. What worries me is the youth of our continent. Our leaders are still just talking, speculating really, while it is time for solutions. Be specific doctor, how do you envision our future, please.

The main point of my book is the exposure of the human trafficking industry and the culture that has created it.

For example, forty percent of young people who have joined rebel movements, militant groups, or criminal gangs said they did it because they had no jobs. This is a problem that will grow beyond our capability to handle it. The industry feeds on this, and the abject poverty plays in to this in a perfect manner for them. The many wars of this continent gave them opportunity for vast covert operations, they are on the loose.

Even so, I don't think appointing blame is the right manner to do things. On the other side, there have been crimes committed and we need to hold people responsible.

How would we do this?

I'm sure that there are laws for that. But that's not, you know, let me say it like this. We need a sense of urgency. The time for solutions is more than a few decades ago. Young people are angry and frustrated, old ones too, why? Because they have no hope for the future? Seems logic, no? Especially the young men can become problematic in that kind of situation. If there is no way to climb the social ladder, the dominance hierarchy, then the young men especially prefer to bring the whole thing to the ground, with violence if necessary.

Because that is the only way they have access to a decent life. Also, talent is rare. I know what you are thinking, now, how do you mean that?

In a situation where the young men have no access to women because of their relative poverty they often become very violent. That is the strategy that creates the best mating opportunities. It is identified by the Gini-coefficient. Sorry, look, the more difference between the rich and the poor the more violence. Most people would agree on this, I believe, it is also one of the best things that came out of the field of Social Studies. In the book I explore this. The ones at the top are usually older men because they had the time to accumulate wealth and position themselves. At the bottom there are young men who are poor or at the start of their career. In a country like this, the young poor women search for stability and expansion. So, these fertile people focus on the few men that have pooled the resources. This means that these men have an disproportionate amount of mating opportunities. Also the young men, full of testosterone, have less access to mating opportunities. If there is no way to become richer then the young men will cheat the system. In other words; criminal activity to become richer and get access to women.

This naturally happens but satisfies few people. Potentially it ruins your whole civilization. I would say that this is the case on the continent, when looking at the middle to long term, as you specified in your question. The men that have all the women become cynical and the women fight over these men. It also means that the ones in high political-economic positions sometimes have strictly sexual reasons that motivate them. That's why institutional monogamy is a good thing. They do it for the, the, you know, hmmm? Indeed.

We should worry for the present and the future. You see, women marry across and up dominance hierarchies. But the more successful in terms of career she is, the more chance there is for her to not be married. Wait, let me explain. As a woman's IQ increases the probability of her finding a suitable partner decreases. And the reason for that is what I just mentioned. Which means? They are intimidating to most men. In a relationship there is a tendency to not respect a man with a paycheck that is slimmer than hers. This is not an opinion; it has been researched. Women underestimate the fear men have for them.

Look, a lot of males have no sexual partner or children. This is not the case with women. Almost all women have one child or more. And it's a rare woman who cannot find a sexual partner. Variability in men is higher, this means that men are more sensitive to status. There are more extremes with men. Yes, yes, no?

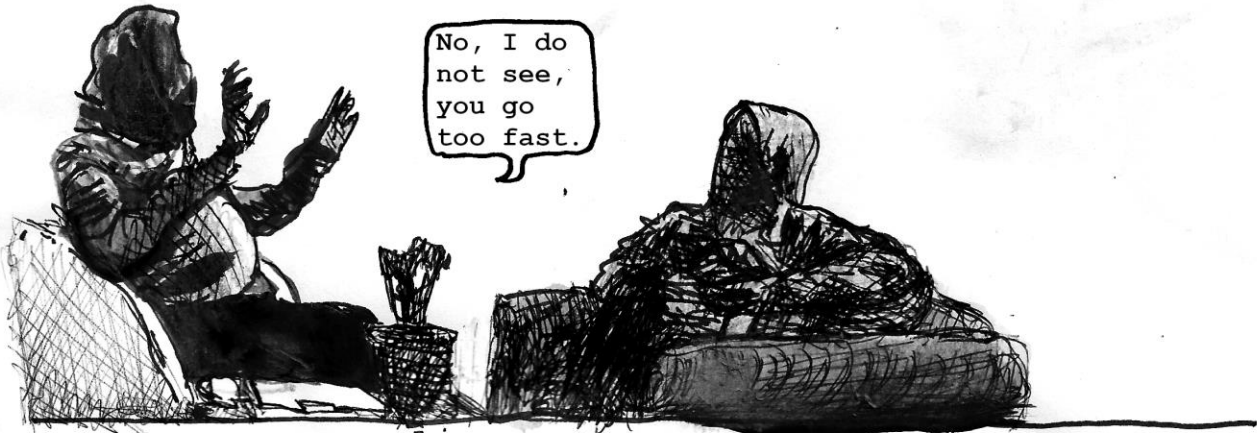

Women like rich men, or adventurous or mysterious ones. Research has shown that female sexual fantasies pool around the following archetypes: billionaire, pirate, werewolf, surgeon, you know. This goes back to, what was it, the Gini-coefficient.

Oh well..

Yup..

You can see
how this
facilitates
the human
trafficking,
yes, no?

The legal definition of human trafficking set forth in the twenty-first century is as follows: the grooming, transportation, transfer, harbouring or receipt of persons, by means of the threat or force or other forms of coercion, of abduction, of fraud, of deception, of the abuse of power, or of a position of vulnerability for the purpose of exploitation. It includes the exploitation of the prostitution of others or other forms of sexual exploitation, forced labour or services, slavery or practices similar to slavery, servitude or the removal of organs. This is a massive epidemic on the planet, and it also exists off-planet where humans are trafficked by military forces and non-human entities for various purposes, and this is referred to as Galactic Human Slavery. Generally, a person is culled for certain purposes and then recruited into covert military programs, or abducted, captured from their families and sold or bartered for purposes including manual slave labor, sex trade, organ harvesting, manufacturing, technical or science engineering expertise, and for blood sacrifice. Many traffickers will sell damaged goods at a lower price, and that means sick or ill children that are near death, for those who enjoy murdering children to buy at discount.

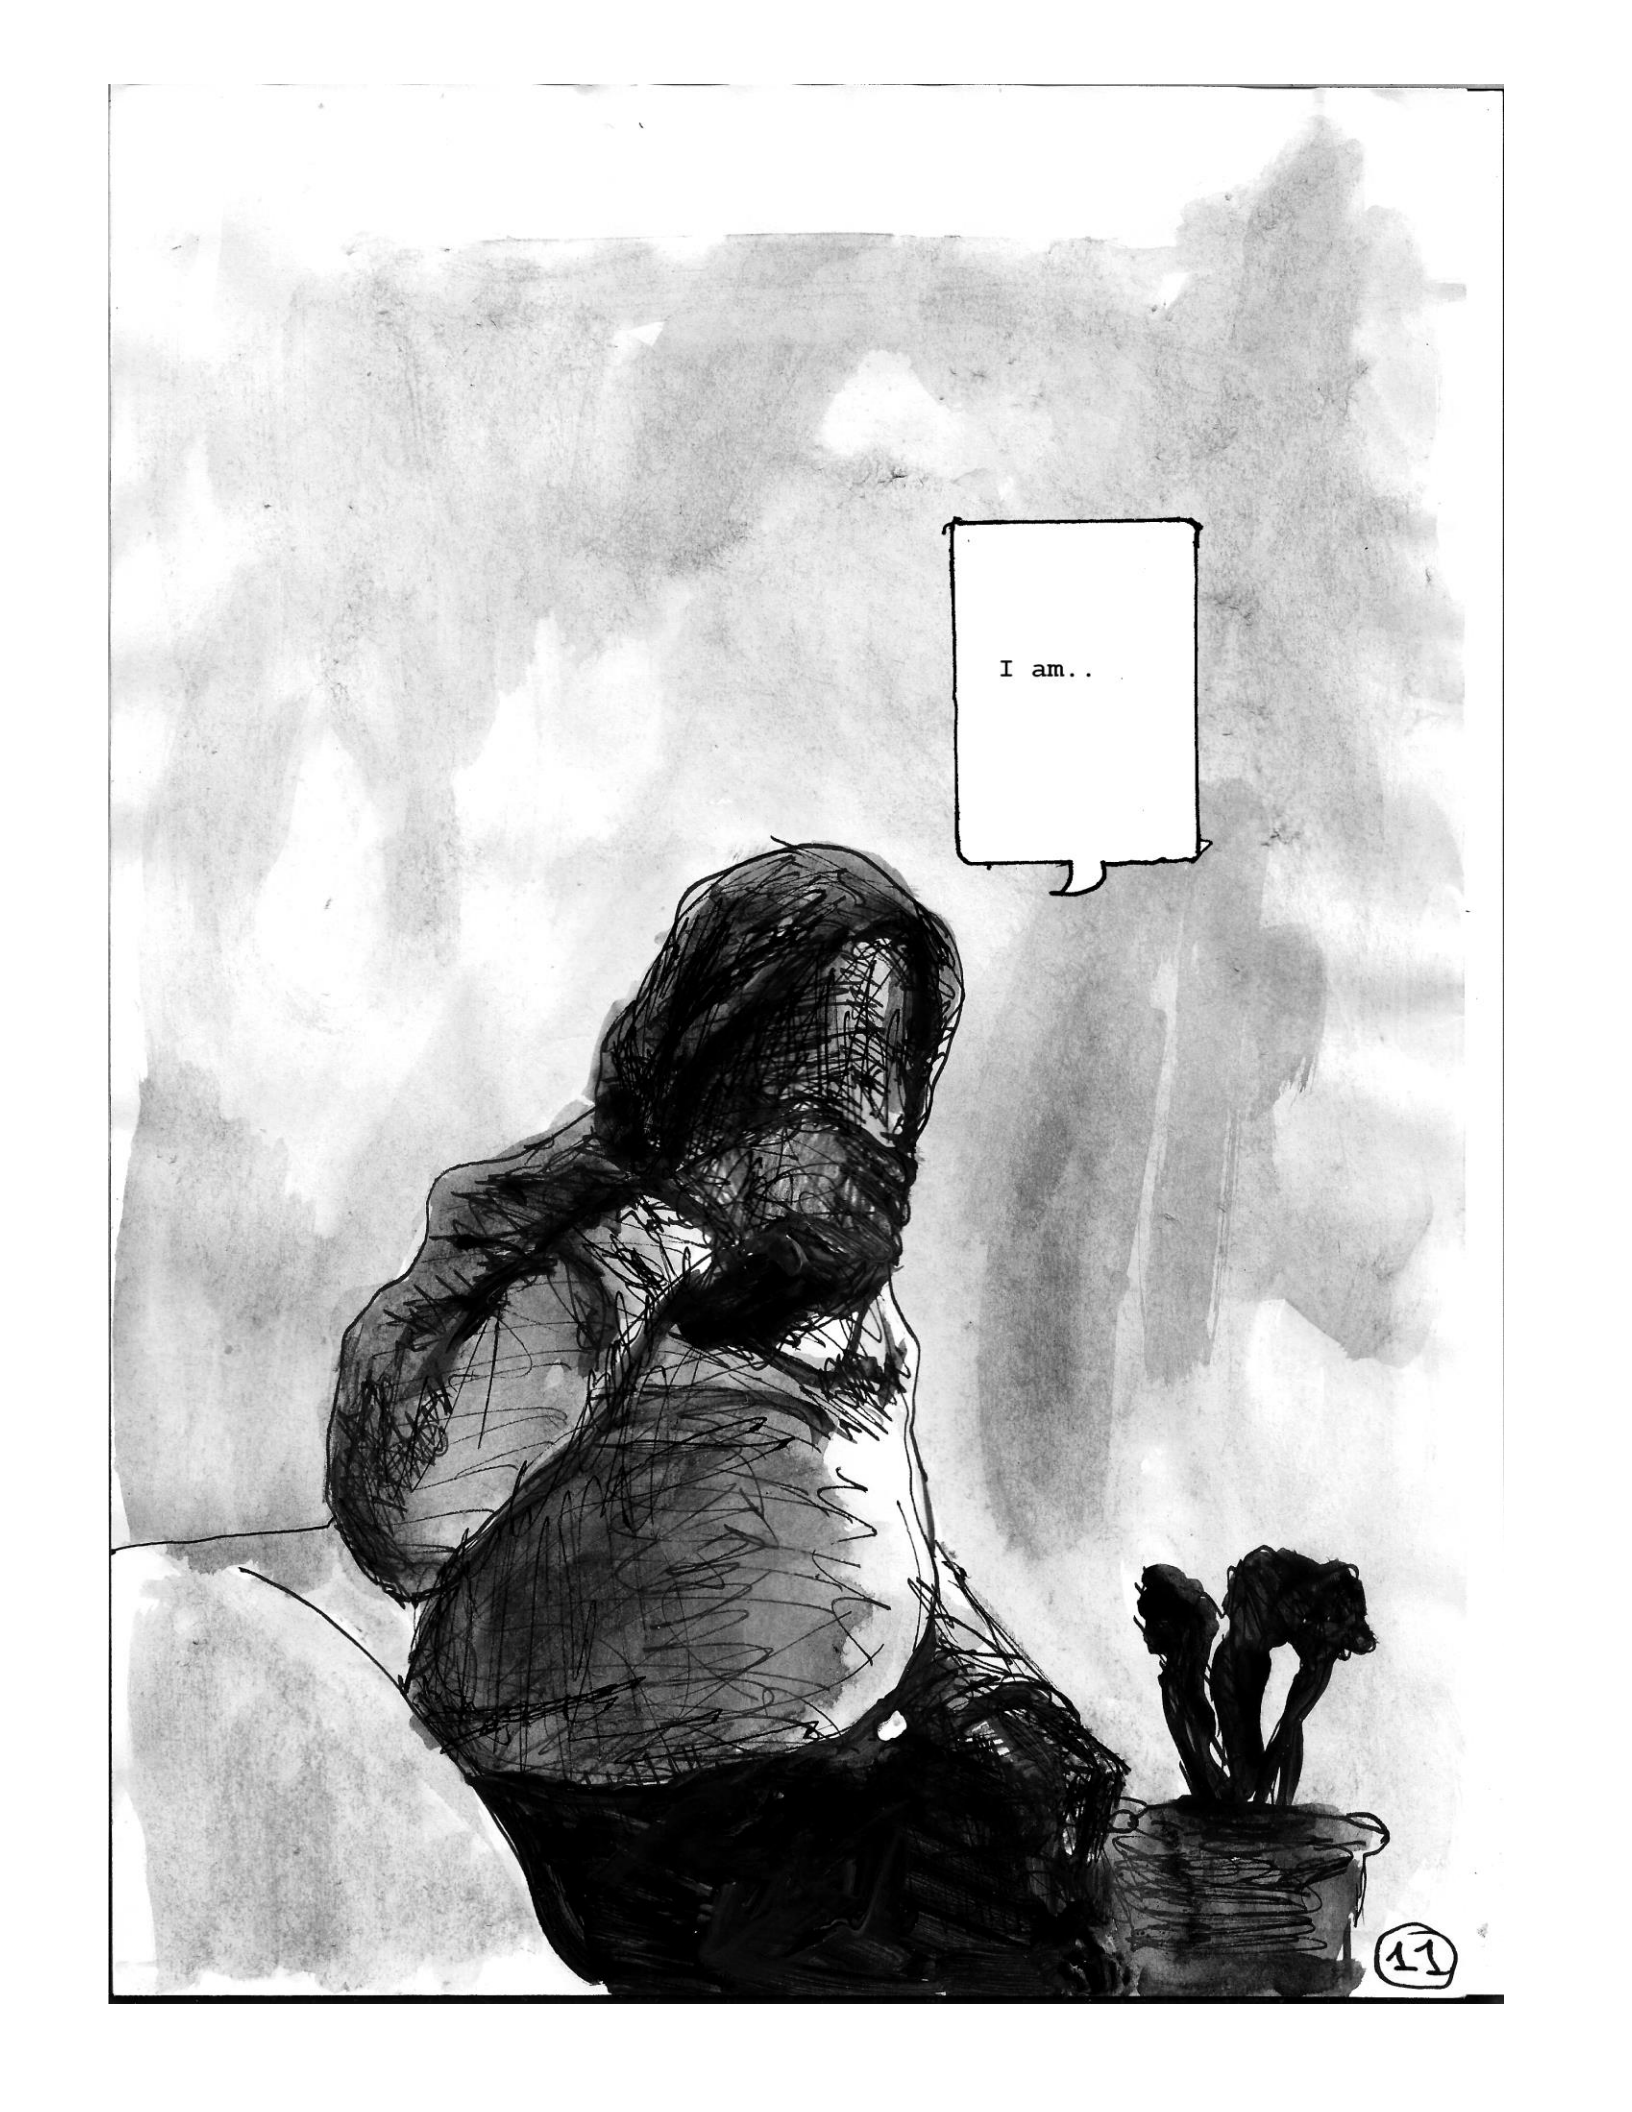

This is a massive epidemic on planet earth. You can understand that this has a massive effect on our globalizing culture, that in turn will normalize the human trafficking and the pornography-culture. This is a feedback loop, this is why I sound the alarm. We have to use authority to end this!

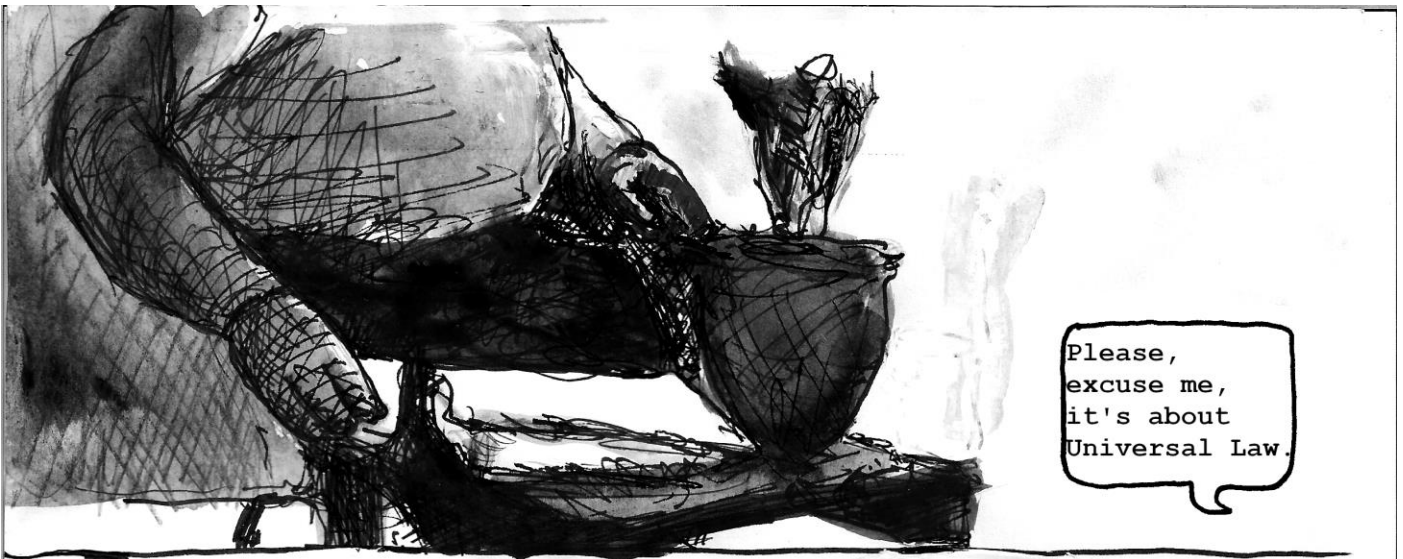

So, what is authority?

Any structure or body be it in any way, shape, or form, is a sovereign individuated being if not otherwise stated in agreements of all levels. All subjects have the right to choose without superimposition of another. A being can however choose to be superimposed through Intent or Consent. The responsibility to direct which energies or connections one allows into the body, container or structure is with the authority of the individual Subject. The apex commander, and with this also the apex defender, of the individual hologram, or natural person or entity, is subject to choice. No third party can superimpose over another being's personal will to choose. All structures, in any way, shape or form, must be defined to determine the energetic signature frequency content within the structure. Listen!

I am...

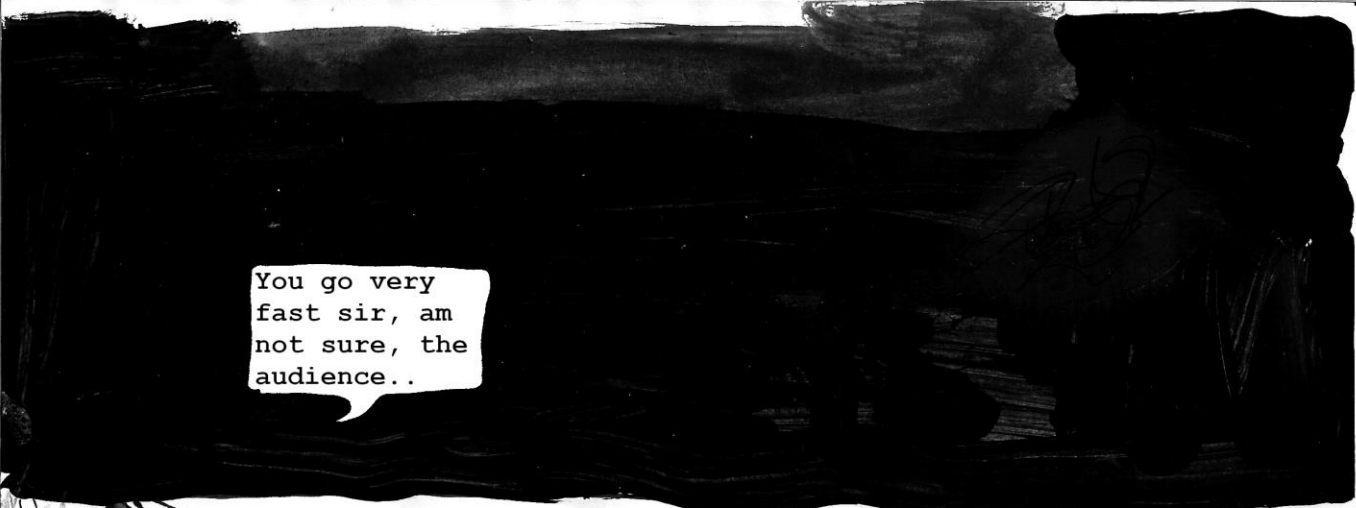

Please,
excuse me,
it's about
Universal Law.

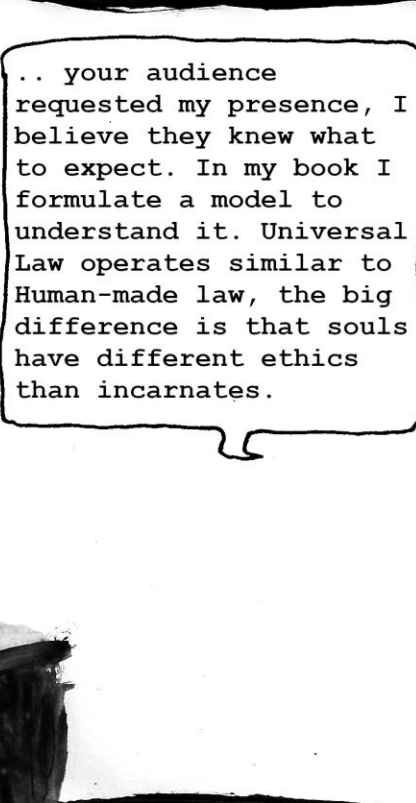

If the energetic or physical structure is not defined with a clear mission, purpose or intention, it means that the structure is not inhabited or vacant and is thus open for invasion, infiltration or influence from external intentions. Tacit consent operates as one gives authority to another without knowing its full Intent. The other is able to perform actions without one's knowledge or approval because the choice of ignorance towards intention of the other. This can be based on either trust, deception or a combination of these polar opposites.

The Intent with which something is created decides de base vector of that creation, and will thus decide the base tone of that ethic in its pathway of manifestation accumulation. If intent is a direction that, when we embark upon that direction, that what is in its future directed path is part of the original intention.

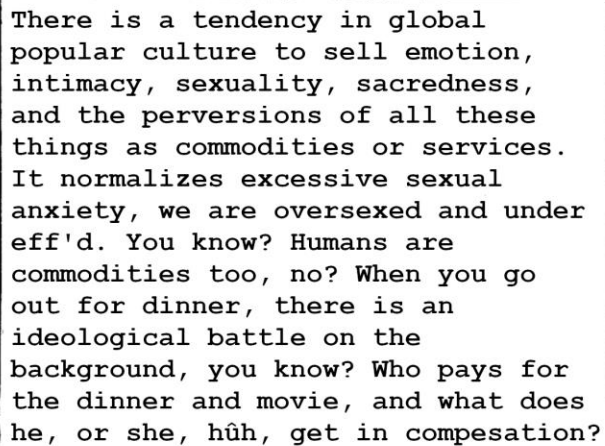

You go very
fast sir, am
not sure, the
audience..

.. your audience
requested my presence, I
believe they knew what
to expect. In my book I
formulate a model to
understand it. Universal
Law operates similar to
Human-made law, the big
difference is that souls
have different ethics
than incarnates.

There is a tendency in global
popular culture to sell emotion,
intimacy, sexuality, sacredness,
and the perversions of all these
things as commodities or services.
It normalizes excessive sexual
anxiety, we are oversexed and under
eff'd. You know? Humans are
commodities too, no? When you go
out for dinner, there is an
ideological battle on the
background, you know? Who pays for
the dinner and movie, and what does
he, or she, hûh, get in comensation?

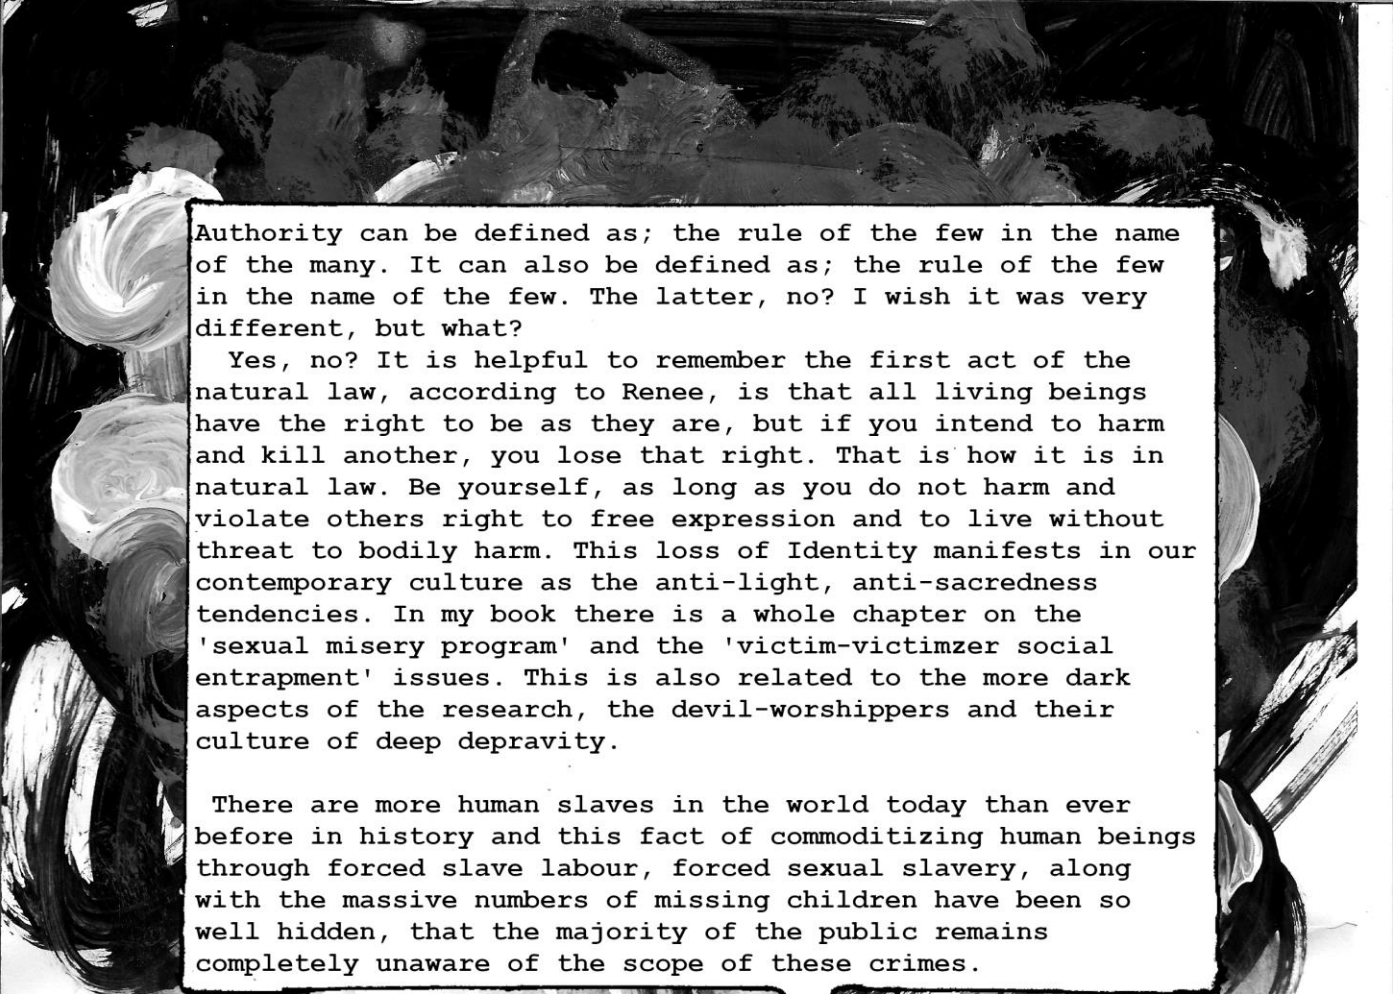

Over the millions of years that the dominance hierarchy exists, it is the environment that pushes the mating male to the top. The male that is most likely to take precedence in the male dominance hierarchy is the most likely to make a genetic contribution. That means that the male dominance hierarchy is a selection mechanism mediated by the female dominance hierarchy.

If marriage law and ideology status among male members of a society in relation to The Gini coefficient is not fine-tuned to correct entropy, there will be no harmony between the primary cisgender axis of that society. Said entropic processes result from Pareto dynamics and Petersonian Archetypes in Darwinian evolutionary framework. It promotes cohesion among its members.

It can also provide for an opportunity to make a categorical ethical difference between females of the own social group and the others. Consequently the morality in relation to these other females can shift dramatically up to the point that they become non-moral objects. The ethics can be reversed in relation to the marriage ideology of the members. Meaning that married men permit themselves to commit adultery since technically the ethics, morals and principles of the marriage don't apply to non-lawful beings. These are thus all females that are not citizens of the society of said male. This opens the doors to human trafficking as a systemic part of the Pareto distribution in a Gini of Inaccessible Hierarchy.

That's a mouth-full hey?

Authority can be defined as; the rule of the few in the name of the many. It can also be defined as; the rule of the few in the name of the few. The latter, no? I wish it was very different, but what?

Yes, no? It is helpful to remember the first act of the natural law, according to Renee, is that all living beings have the right to be as they are, but if you intend to harm and kill another, you lose that right. That is how it is in natural law. Be yourself, as long as you do not harm and violate others right to free expression and to live without threat to bodily harm. This loss of Identity manifests in our contemporary culture as the anti-light, anti-sacredness tendencies. In my book there is a whole chapter on the 'sexual misery program' and the 'victim-victimzer social entrapment' issues. This is also related to the more dark aspects of the research, the devil-worshippers and their culture of deep depravity.

There are more human slaves in the world today than ever before in history and this fact of commoditizing human beings through forced slave labour, forced sexual slavery, along with the massive numbers of missing children have been so well hidden, that the majority of the public remains completely unaware of the scope of these crimes.

Wait, please mister Meigos, one of your critics, Fiorenza, regards the mass-majority of Humanity not capable to see beyond the veils of the 9th ray. Thus they stay in the realm of dogmatic beliefs, religious ideologies, erratic paranormal phenomena, escapism, drug addiction and mass followings. He does not label it a bad thing but puts it into the context of the re-incarnational re-evolution of souls into ascension. Of course there are souls that self-illuminate or pierce through the veil via soul growth performed through Earth school theatre. This is significantly different in relation to your perspective. Because if one looks at in from a soul perspective, these are souls performing theatre, but if one looks at it from the perspective of the Human on surface-earth, there is a great injustice being done. I guess my question, I'm pretending to be an advocate for the devil, 'why should people care for the suffering of others when they have the opportunity to make easy profit off slaves'?

I must say that I would never commit such a crime, but I understand that it has monetary value.

I believe contemporary culture is based on slavery. But I do not have the knowledge to back that up.

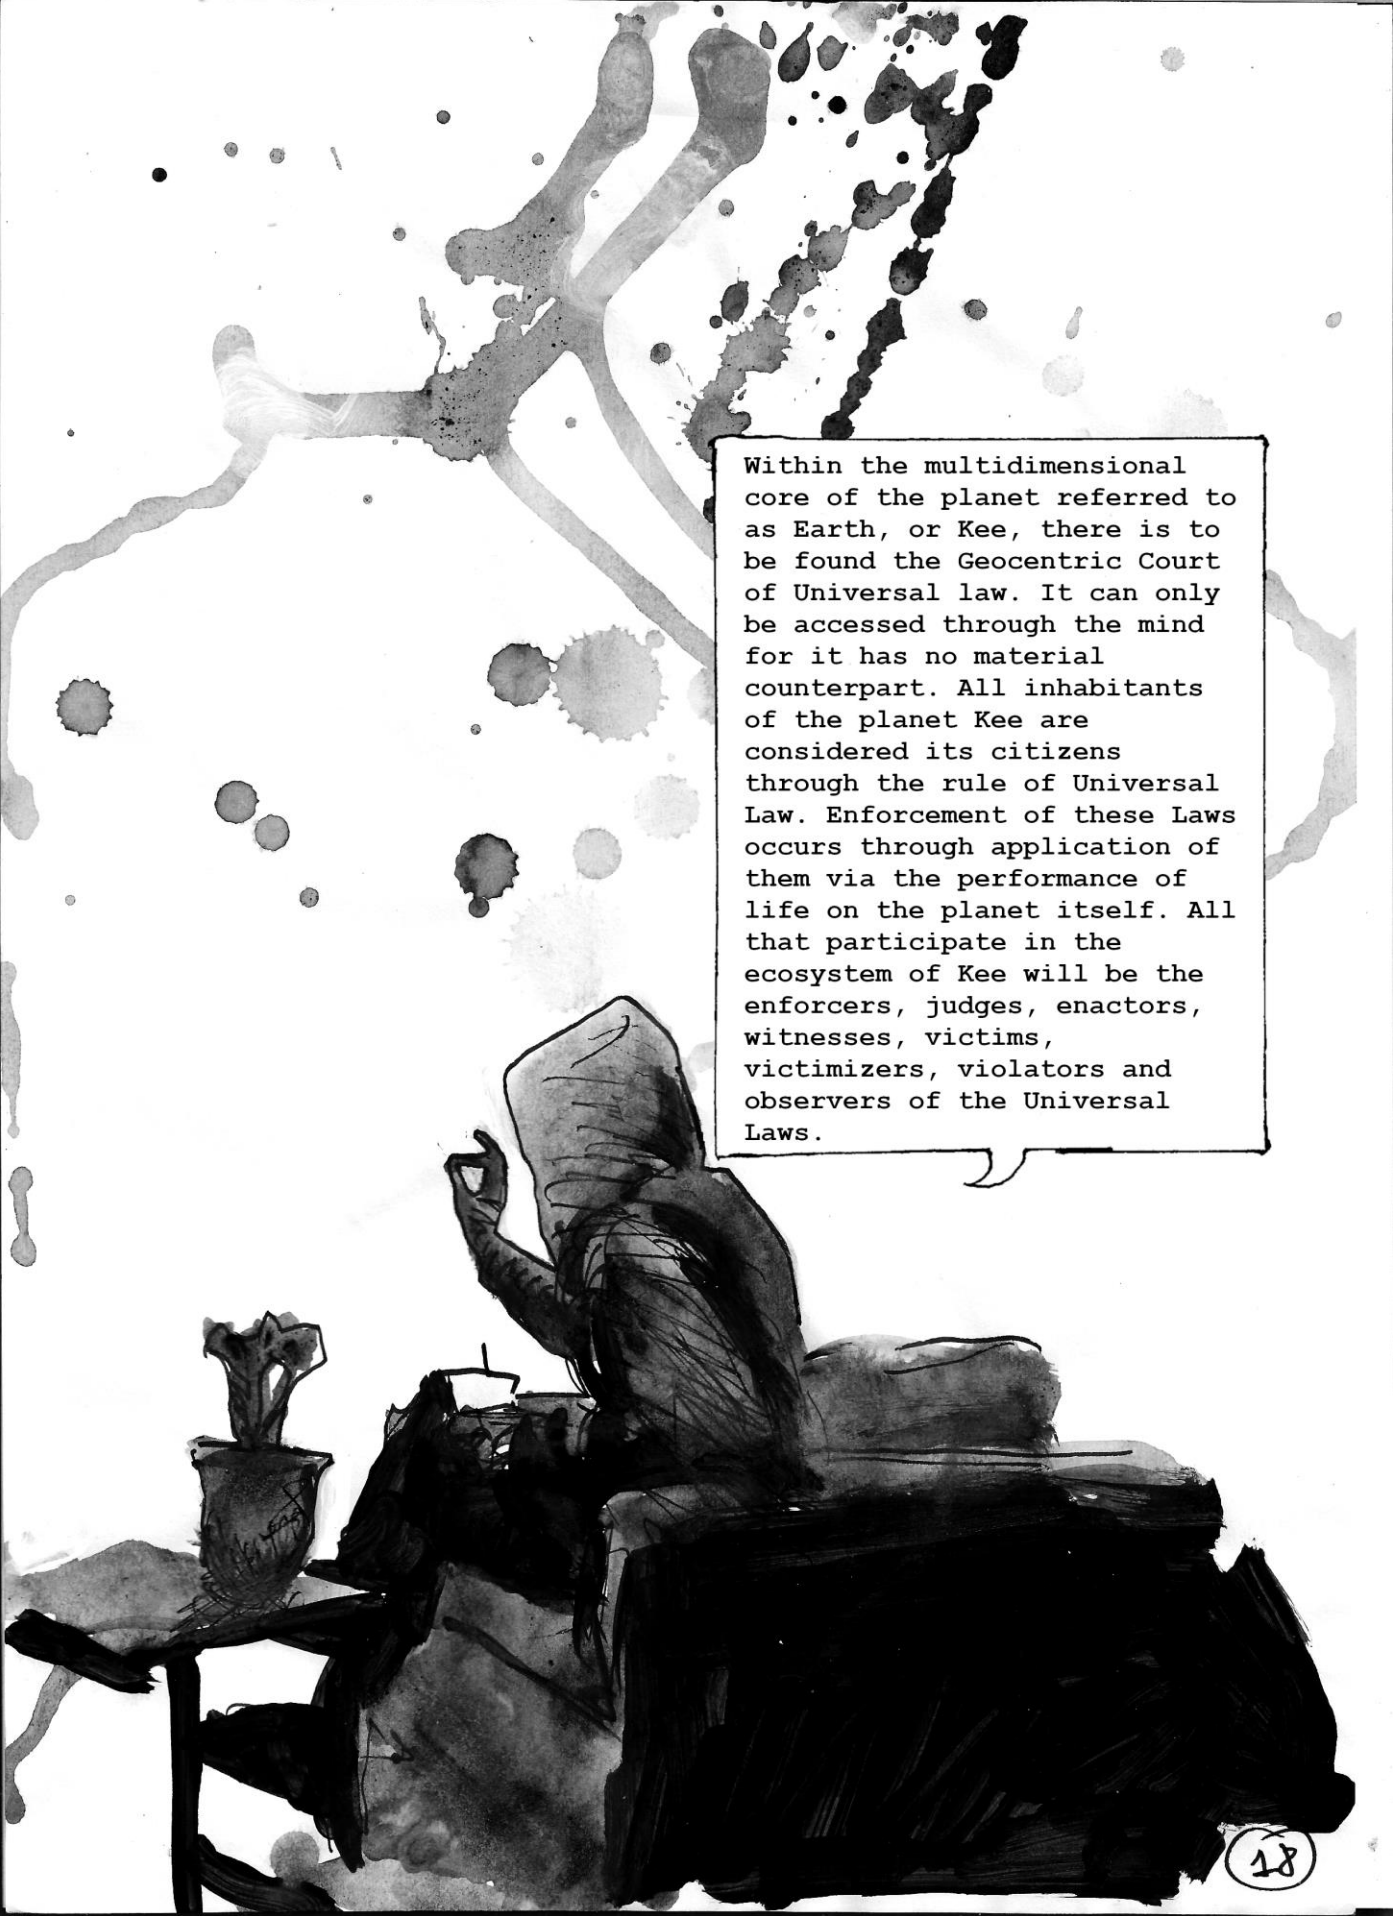

The Heliosphere is a womb or school where Celestial beings can inhabit space-time and hold space for other, smaller beings. Sol holds space-time for us to exist in, protected from the cosmic rays and contextualized by its makeup. The Music of the Spheres is the holistic dynamic of the heliosphere.

Earth is continuous under the bombardment of Solar rays. The rotation of Earth creates a dynamo-like dynamic, with its light electrical side and dark magnetic side, and the influence of the Moon. So it is, with an artistic license, analogous to a crystal resonator, in salt water, spinning in a gravitational container, singing a song to Sol's heartbeat.

Events in the global arena dramatize and reflect that which is occurring within the collective consciousness, of which we all contribute to and must own.

Geocentric conjunctions reveal more of a surface experience, while heliocentric synodic themes reveal the transcendent cycles of growth that underlie our experience.

Within the multidimensional core of the planet referred to as Earth, or Kee, there is to be found the Geocentric Court of Universal law. It can only be accessed through the mind for it has no material counterpart. All inhabitants of the planet Kee are considered its citizens through the rule of Universal Law. Enforcement of these Laws occurs through application of them via the performance of life on the planet itself. All that participate in the ecosystem of Kee will be the enforcers, judges, enactors, witnesses, victims, victimizers, violators and observers of the Universal Laws.

One can directly engage with the Geocentric Court of Universal Law of Kee through direct mental communication with its chief administrator: Kee. Access to the court is only permitted to those that can synchronize to its base principle when in presence of the court: Do no harm to others.

The Bartzonian paradigm propels us to interpret the solar system as a prison under quarantine. Because of the Timeline Wars, the Founders have decided to make this heliosphere a paradox remedy field, in which souls can release the burden of karmic and dharmic debt.

Some of the extraterrestrial factions decided to use the earth as a prison planet for trapping and containing all undesirables, including those entities that were not compliant to their authoritarian rule or were straight out criminals or degenerate perverts.

For example, they often use a debt collection vehicle, which is a tool that accumulates obligation so as to overwhelm the debtor and so hoard wealth for the creditor and entrap the debtor. It can be used as a weapon as has been done so in the context of the divide and conquer strategy on a species wide level embedded in the Nation State system. It works on every value-exchange system and is compatible with the karma-dharma dynamic. Thus an odious karmic debt that is incurred by a regime for purposes that do not serve the interest of the state are to be considered personal debts of the regime and not debts of the state.

What is now, 2021, in popularized terms considered artificial intelligence is a proper marketing strategy but false, or wrong, in the context of this text. One is better off labelling it 'advanced computational processing'. The system of churches around the world is a cybernetic intelligent system. From hardware to software and users, it is all there. And better yet, in an Reneesian universe, the Geomagnetic Grid of the planet IS the mind of the planet that is partly being run by AI's. These weaponized geo-telluric-doradic software entities have names and are etheric beings that inhabit specific layers of the ecosystem, like scalar base pulse rhythms, that in turn influence the Schumann resonance, for example. Within popular discourse only digital media technology, robotic manufacturing, as well as military cybernetic weaponry have been accepted in the current technocratic move into the AI-hype.

Esoteric practices and the computational qualities of bees within the flora of the planet are not considered. The term intelligence is filtered through the Turing test but for Dreamtime Science this is not enough. Turing, I believe, had an implicit curriculum in the test. The one that enacts the testing is being tested itself in relation to the theme of the perception of intelligence itself. Within Dreamtime Science intelligent life can inhabit anything, Source is such a being.

The Collective Consciousness runs life-paths within the calculus of The Geocentric Court of Universal Law. This creates Qualia, which is raw data in the form of Ackashic Records of the subject. These life-paths are traded by Kee with Spiritual entities in an open market manner. Individual spirits can thus negotiate with the planet about what life they would like to have, what the actual possibilities are, and what they have to offer in return as contribution to the ecosystem of the planet. This can be a debt being payed to another planet and be done en masse. The term Commerce is proper since the concepts of currency, politics, warfare, and entrepreneurship are applicable and understandable in this context. Entities, civilizations, and organizations can use spiritual commerce in the form of spiritual entrepreneurship and go as far as to create spiritual empires that challenge the source of creation itself, many have tried.

The military industrial complex is nowadays labelled the 'deep state'. Within conspiracy circles and journalism in general I would argue that there is too much emphasis on mal-intentions from the part of the apex of these hierarchies. I align with Deane in regarding more than ninety-nine percent of the people who work in governments and depth of states as unaware of the apex dynamics. In other words people just don't know what is 'really' going on. This is the nature of these hierarchies since they involve huge finances, violence of the highest level meaning security of state and its citizens, bureaucracy and international military entities. This is a dynamic of the hierarchy of apexes of hierarchies. Thus this is related to the big drama dynamic that spans over millennia since it is about Earth as real estate. Within this dynamic Deane states that all global nations since the 1930s have been covertly and progressively compromised to be absorbed by the apex-hierarchy. This world-management team of apex-of-hierarchy positions are subject to another hierarchy; interplanetary relations, commerce and politics.

Since that time, *they*, have been under extreme pressure to advance with an agenda that supports foreign interests.

This is the phase we are in now. It is the collective human consciousness, it has recognized that there is a fourth industrial revolution being pushed, accelerated by an hidden hand, an AI space age is being born. What we see now, 2021, is of 'recruitment'. The last two to three years there has been an automatization craze in the developed countries. 4IR is upon its dawn. But for the developing countries the game is to have all the previous industrial revolutions at once. They are playing catch-up in relation to developed countries. The advantage is that the development, flops, and initial errors will be played out on the side of rich countries, while the poor can just copy-paste whatever works locally.

And let's not forget, a tangent..

In 2020 three major synods have occurred that Fiorenza has labelled the 'Societal Reset' and 'Great Transformation'. Those are the before mentioned heliosphere dynamics that mark a pivotal point as potent as the end of 1980s. The pandemic virus has been the major vessel for the manifestation of this movement, politically speaking. I will not bother engaging the virus itself, for many others have been doing so, and still are. My task is to examine Mozambique's relation to the collective.

What, Oh,
right,
our time
is up my
dear
audience.

That went
fast, I
feel like
I've been
speaking
for hours.
